INE - CCIE Security Lab Preparation Bootcamp Training

The CCIE Security Lab Preparation Bootcamp focuses on developing a structured approach to passing CCIE Lab Exam along with how to interpret CCIE Lab Exam questions and implement their solution. During this bootcamp, candidates will concentrate on hands-on scenarios as they work through advanced CCIE level material not found in any of our other products. Since this bootcamp is presented in a self-paced format candidates can follow along at their own pace with our instructors. This bootcamp not only provides the practical knowledge needed to pass the CCIE Lab Exam, but also the real-world experience and understanding needed by senior security engineers in their day-to-day job. **Lab Preparation Bootcamp Outline:** * Module 1 o Lesson 1 - ASA Firewall Part 1 o Lesson 2 - ASA Firewall Part 2 o Lesson 3 - ACLs/IOS Firewall * Module 2 o Lesson 1 - Zone Based Firewall o Lesson 2 - VPN o Lesson 3 - Miscellaneous Features, IPSec o Lesson 4 - DMVPN * Module 3 o Lesson 1 - GET VPN o Lesson 2 - WebVPN/Remote Access o Lesson 3 - AAA Passwords/Privileges o Lesson 4 - AAA Auth Proxy/Features o Lesson 5 - AAA Server Configuration * Module 4 o Lesson 1 - Management Part 1 o Lesson 2 - Management Part 2 o Lesson 3 - IPS Part 1 o Lesson 4 - IPS Part 2 o Lesson 5 - IDS-IDM Configuration o Lesson 6 - IOS IPS * Module 5 o Lesson 1 - L2 Security o Lesson 2 - Attack Mitigation o Lesson 3 - Network Attacks o Lesson 4 - Lab Strategy Download | **Size:** 27.7GB **[This hidden password content is only available for our VIP member.
