

SWITCH - Implementing Cisco Switched Networks Lab Guide Version 1.0

Cisco has updated its Cisco CCNP® certification for network engineers through a comprehensive process involving customers and partners from around the globe. The revision focuses on the competencies that are needed to plan, implement, and troubleshoot the routed and switched networks of today and is designed to be more predictive of job readiness. CCNP offers a career development path for Cisco CCNA® certified network engineers and a solid foundation for those who are interested in Cisco CCIE®.

Cisco has redesigned the CCNP courses and exams to reflect the evolving job tasks of global network professionals.

SWITCH v1.0 ? Implementing Cisco IP Switched Networks ? is a five-day instructor-led course in which network professionals will learn to plan, configure, and verify the implementation of complex enterprise switching solutions, using Cisco Enterprise Campus Architecture. SWITCH v1.0 also covers secure integration of VLANs, WLANs, voice, and video into campus networks.
