

Internetwork Expert - CCIE Route Redistribution Demystified (Online/On-Demand)

Internetwork Expert CCIE Catalyst QoS (Online/On-Demand) This seminar explores the principles and practice of implementing Layer 2 and Layer 3 Quality of Service on Cisco Catalyst IOS. Using a structured logical approach our instructors will show you how to plan, implement, verify, and troubleshoot an end-to-end QoS design in Ethernet based LANs and Metro-Ethernet based WANs. This seminar also includes hands-on examples using the Catalyst 3550 and 3560 platforms as the instructors walk you step-by-step through advanced QoS scenarios live on the command line interface. **Internetwork Expert CCIE Route Redistribution Demystified (Online/On-Demand)** This seminar explores the principles and practice of configuring, verifying, and troubleshooting advanced IPv4 route redistribution in the CCIE Lab Exam. Using a structured logical approach our instructors will show you how to plan your attack, verify your work, troubleshoot your configurations, and track your progress as you build your network topology toward full Layer 3 reachability. This seminar also includes hands-on examples as the instructors walk you step-by-step through advanced route redistribution scenarios live on the IOS command line interface.
