QUESTION 141 An employee who works from home telephones your help desk. A virus attack has deleted his computer's single internal hard disk. He carried out a System Image backup on his computer three months ago and automatically backs up his personal files every night. He uses an external USB hard drive formatted with the NTFS file system to hold his backups. All his personal files are in his Documents library. What should you advise? (Choose all that apply; the answers form a complete solution.) A. Carry out a System Image restore. B. Carry out a system restore. C. Use Restore Previous Versions to restore his Documents library from a shadow copy. D. Use Restore My Files in the Backup And Restore console to restore his Documents library folder. Answer: AD

QUESTION 142 You are deciding on which storage devices you want to configure system protection. System protection is enabled by default on your C: drive, which holds your system files. No other storage device on your computer has system protection enabled. On which of the following storage devices can you enable system protection? (Choose all that apply.) A. Your second internal hard disk, formatted with NTFS B. An external USB hard

disk formatted with FAT C. A USB flash drive D. Your optical drive E. A mounted VHD created on your second internal hard disk Answer: AE QUESTION 143 You are testing unsigned device drivers on a computer on an isolated test network. You install a display driver and find that the computer boots to a blank screen. You restart the computer and press F8. What Advanced Boot Options could you choose to help remedy the situation? (Choose all that apply.) A. Safe Mode B. Enable Boot Logging C. Enable Low Resolution Video D. Last Known Good Configuration (Advanced) E. Disable Driver Signature Enforcement Answer: ACD QUESTION 144 You have recently installed Windows 7 Ultimate on a laptop computer, installed applications such as Office, and downloaded and installed all outstanding updates. The computer has two internal hard disks, both formatted with the NTFS file system. You also have an external USB hard disk that you have plugged into the laptop. You used the convert fs/ntfs command to convert the external hard drive to the NTFS file system. You have an 8 GB USB flash memory device and the laptop contains a DVD-ROM writer. In your workplace, you can plug in to the corporate network and connect to a network share on a file server running Windows Server 2008 R2. On what devices can you create a full System Image backup of the laptop's system volume? (Choose all that apply.) A. The second internal hard disk B. The external hard disk C. The USB flash drive D. Multiple DVD-ROMs E. The network share Answer: ABE QUESTION 145 Kim Akers has an administrator account on a computer running Windows 7 Enterprise. Don Hall has a standard account on the same computer. Both users have Microsoft Office Word and Microsoft Office Excel files saved in their Documents library. Don stores Microsoft Office PowerPoint presentations in a subfolder of his Documents library named Presentations. He also stores digital photographs in his Pictures library. Don has created a folder called Secret in his Documents library and has encrypted the folder and its contents. He stores confidential files in that folder. When Don last logged on, he deleted some personal files but did not empty his Recycle Bin. Kim is logged on to the computer. She has plugged in a USB flash memory device that holds personal files but has not yet copied any of these files to the computer. She has never formatted the flash memory device. The computer is configured to let Windows decide what files and folders to back up. Kim opens the Backup And Restore console but does not change any settings. She clicks Backup Now. Which files are backed up? (Choose all that apply.) A. The Word and Excel files in Don's Documents library B. The Word and Excel files in Kim's Documents library C. The PowerPoint files in Don's Presentation folder D. The digital photographs in Don's Pictures library E. The files in Don's Secret folder F. The files in Don's Recycle Bin G. The files on Kim's USB flash memory device Answer: ABCD QUESTION 146 You work as the desktop support technician. The network consists of a single Active Directory domain named Lead2pass.com.
