<https://drive.google.com/open?id=1q16fluansPX6oRsh6xCyVACMIbBzUIU> NEW QUESTION 1 Margie's Travel is an international travel and bookings management service. The company is expanding into restaurant bookings. You are tasked with implementing Azure Search for the restaurants listed in their solution. You create the index in Azure Search. You need to import the restaurant data into the Azure Search service by using the Azure Search NET SDK. Solution: 1. Create a SearchIndexClient object to connect to the search index. 2. Create an IndexBatch that contains the documents which must be added. 3. Call the DocumentsIndex method of the SearchIndexClient and pass the IndexBatch. Does the solution meet the goal?

A. Yes B. No Answer: B NEW QUESTION 2 You are developing a software solution for an autonomous transportation system. The solution uses large data sets and Azure Batch processing to simulate navigation sets for entire fleets of vehicles. You need to create compute nodes for the solution on Azure Batch. What should you do?

A. In Python, implement the class: TaskAddParameter. B. In Python, implement the class: JobAddParameter. C. In the Azure portal, create a Batch account. D. In a .NET method, call the method: batchClient.PoolOperations.CreatePool. Answer: A NEW QUESTION 3 You are creating a hazard notification system that has a single signaling server which triggers audio and visual alarms to start and stop. You implement Azure Service Bus to publish alarms. Each alarm controller uses Azure Service Bus to receive alarm signals as part of a transaction. Alarm events must be recorded for audit purposes. Each transaction record must include information about the alarm type that was activated. You need to implement a reply trail auditing solution. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Assign the value of the hazard message SessionID property to the SequenceNumber property. B. Assign the value of the hazard message SequenceNumber property to the DeliveryCount property. C. Assign the value of the hazard message MessageId property to the DeliveryCount property. D. Assign the value of the hazard message SessionID property to the ReplyToSessionId property. E. Assign the value of the hazard message MessageId property to the SequenceNumber property. F. Assign the value of the hazard message MessageId property to the CorrelationId property. Answer: AB NEW QUESTION 4 You provide an Azure API Management managed web service to clients. The back end web service implements HTTP Strict Transport Security (HSTS). Every request to the backend service must include a valid HTTP authorization header. You need to configure the Azure API Management instance with an authentication policy. Which two policies can you use? (Each correct answer presents a complete solution. Choose two.)

A. Certificate Authentication B. Basic Authentication C. OAuth Client Credential Grant D. Digest Authentication Answer: AC NEW QUESTION 5 You are developing a project management service by using ASP.NET. The service hosts conversations, files, to-do lists, and a calendar that users can interact with at any time. The application uses Azure Search for allowing users to search for keywords in the project data. You need to implement code that creates the object which is used to create indexes in the Azure Search service. Which two objects should you use? (Each correct answer presents part of the solution. Choose two.)

A. SearchService B. SearchIndexClient C. SearchServiceClient D. SearchCredentials Answer: CD NEW QUESTION 6 You must implement Application Insights instrumentation capabilities utilizing the Azure Mobile Apps SDK to provide meaningful analysis of user interactions with a mobile app. You need to capture the data required to implement the Usage Analytics feature of Application Insights. Which three data values should you capture? (Each correct answer presents part of the solution. Choose three.)

A. Session ID B. Events C. User ID D. Exception E. Trace Answer: ABC NEW QUESTION 7 You need to meet the LabelMaker security requirement. What should you do?

A. Create a conditional access policy and assign it to the Azure Kubernetes Service cluster. B. Place the Azure Active Directory account into an Azure AD group. Create a ClusterRoleBinding and assign it to the group. C. Create a Microsoft Azure Active Directory service principal and assign it to the Azure Kubernetes Service (AKS) cluster.

D. Create a RoleBinding and assign it to the Azure AD account. Answer: D
NEW QUESTION 8 You develop an Azure web app. You monitor performance of the web app by using Application Insights. You need to ensure the cost for Application Insights does not exceed a preset budget. What should you do?
A. Implement ingestion sampling using the Azure portal.
B. Set a daily cap for the Application Insights instance.
C. Implement adaptive sampling using the Azure portal.
D. Implement adaptive sampling using the Application Insights SDK.
E. Implement ingestion sampling using the Application Insights SDK. Answer: B
NEW QUESTION 9 HotSpot A company is developing a gaming platform. Users can join teams to play online and see leaderboards that include player statistics. The solution includes an entity named Team. You plan to implement an Azure Redis Cache instance to improve the efficiency of data operations for entities that rarely change. You need to invalidate the cache when team data is changed. How should you complete the code? (To answer, select the appropriate options in the answer area.)

Answer Area

Answer: Answer Area

```
void ClearCachedTeams()
{
    IDatabase cache = Connection.GetDatabase();
    ICache cache = Connection.GetDatabase();
    cache.KeyDelete("teams");
    cache.StringSet("teams", "");
    cache.ValueDelete("teams");
    cache.StringGet("teams");
}
```

NEW QUESTION 10 Drag and Drop You develop software solutions for a mobile delivery service. You are developing a mobile app that users can use to order from a restaurant in their area. The app uses the following workflow: 1. A driver selects the restaurants for which they will deliver orders. 2. Orders are sent to all available drivers in an area. 3. Only orders for the selected restaurants will appear for the driver. 4. The first driver to accept an order removes it from the list of available orders. You need to implement an Azure Service Bus solution. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

- Actions**
- Create a Service Bus topic for each restaurant for receive messages.
 - Create a single Service Bus topic.
 - Create a single Service Bus subscription.
 - Create a single Service Bus Namespace.
 - Create a Service Bus Namespace for each restaurant receive messages.
 - Create a Service Bus subscription for each restaurant can receive orders.

Answer:

Actions	Answer area
Create a Service Bus topic for each restaurant for which a driver can receive messages.	Create a single Service Bus topic.
Create a single Service Bus topic.	Create a Service Bus Namespace for each restaurant for which a driver can receive messages.
Create a single Service Bus subscription.	Create a Service Bus topic for each restaurant for which a driver can receive messages.
Create a single Service Bus Namespace.	
Create a Service Bus Namespace for each restaurant for which a driver can receive messages.	
Create a Service Bus subscription for each restaurant for which a driver can receive orders.

Case Study 1 - Coho Winery Coho Winery produces, bottles, and distributes a variety of wines globally. You are a developer implementing highly scalable and resilient applications to support online order processing by using Azure solutions. Coho Winery has a LabelMaker application that prints labels for wine bottles. The application sends data to several printers. The application consists of five modules that run independently on virtual machines (VMs). Coho Winery plans to move the application to Azure and continue to support label creation. NEW QUESTION 51 You need to meet the security requirements for the E-Commerce Web App. Which two steps should you take? (Each correct answer presents part of the solution. Choose two.)

- A. Create an Azure AD service principal.
 - B. Enable Managed Service Identity (MSI) on the E-Commerce Web App.
 - C. Add a policy to the Azure Key Vault to grant access to the E-Commerce Web App.
 - D. Update the E-Commerce Web App with the service principal's client secret.
- Answer: CD

NEW QUESTION 52 You need to provision and deploy the order workflow. Which three components should you include? (Each correct answer presents part of the solution. Choose three.)

- A. Workflow definition
 - B. Connections
 - C. Resources
 - D. Functions
 - E. On-premises Data Gateway
- Answer: CDE

NEW QUESTION 53 You need to meet the LabelMaker application security requirement. Solution: 1. Place the Azure Active Directory account into an Azure AD group. 2. Create a ClusterRoleBinding and assign it to the group. Does the solution meet the goal?

- A. Yes
 - B. No
- Answer: A Explanation: In the scenario of this case: the LabelMaker applications must be secured by using an AAD account that has full access to all namespaces of the Azure Kubernetes Service (AKS) cluster. Permissions can be granted within a namespace with a RoleBinding, or cluster-wide with a ClusterRoleBinding.

<https://kubernetes.io/docs/reference/access-authn-authz/rbac/> NEW QUESTION 54 Case Study 2 - Litware, Inc. You are a developer for Litware, Inc., which is a SaaS company that provides a solution for managing employee expenses. The solution consists of an ASP.NET Core Web API project that is deployed as an Azure Web App. NEW QUESTION 66 You need to ensure that the SecurityPin security requirements are met. Solution: 1. Enable Always Encrypted for the SecurityPin column using a certificate based on a trusted certificate authority. 2. Update the Getting Started document with instructions to ensure that the certificate is installed on user machines. Does the solution meet the goal?

- A. Yes
 - B. No
- Answer: B

NEW QUESTION 67 You need to resolve the log capacity issue. What should you do?

- A. Implement Application Insights Sampling.
 - B. Change the minimum log level in the host.json file for the function.
 - C. Create an Application Insights Telemetry Filter.
 - D. Set a LogCategoryFilter during startup.
- Answer: A

NEW QUESTION 68 Case Study 3 - Proseware, Inc. You are a developer for Proseware, Inc. You are developing an application that applies a set of governance policies for Proseware's internal services, external services, and applications. The application will also provide a shared library for common functionality. NEW QUESTION 71 You need to ensure that authentication events are triggered and processed according to the policy. Solution: Create separate Azure Event Grid topics and subscriptions for sign-in and sign-out events. Does the solution meet the goal?

- A. Yes
 - B. No
- Answer: A

NEW QUESTION 72 You need to resolve a notification latency issue. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Ensure that the Azure Function is using an App Service plan.
 - B. Set Always On to false.
 - C. Ensure that the Azure Function is set to use a consumption plan.
 - D. Set Always On to true.
- Answer: AD

Explanation: Azure Functions can run on either a Consumption Plan or a dedicated App Service Plan. If you run in a dedicated mode, you need to turn on the Always On setting for your Function App to run properly. The Function runtime will go idle after a few minutes of inactivity, so only HTTP triggers will actually "wake

up" your functions. This is similar to how WebJobs must have Always On enabled.

<https://github.com/Azure/Azure-Functions/wiki/Enable-Always-On-when-running-on-dedicated-App-Service-Plan> NEW

QUESTION 73 You need to ensure that the solution can meet the scaling requirements for Policy Service. Which Azure Application Insights data model should you use? A. an Application Insights metric

B. an Application Insights dependency C. an Application Insights trace

D. an Application Insights event Answer: D NEW QUESTION 74

..... Case Study 4 - Best for You Organics Company Best for You Organics Company is a global restaurant franchise that has multiple locations. The company wants to enhance user experiences and vendor integrations. The company plans to implement automated mobile ordering and delivery services.

..... NEW QUESTION 86 You need to meet the vendor notification requirement. Solution: Update the Delivery API to send emails by using a cloud-based email service. Does the solution meet the goal? A. Yes

B. No Answer: B NEW QUESTION 87 You need to update the chatbot to greet the user when they sign in. Which two rich card formats can you use? (Each correct answer presents a complete solution. Choose two.)

A. Thumbnail B. Adaptive C. Sign-in

D. Hero E. Animation Answer: AC NEW QUESTION 88
