<https://drive.google.com/open?id=17Q2OzlbW-1bt-KRKvBoEnc1DSMDQoZzQ> NEW QUESTION 191 Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016. Server1 has a volume named Volume1. A central access policy named Policy1 is deployed to the domain. You need to apply Policy1 to Volume1. Which tool should you use? A. File Explorer B. Shared Folders C. Server Manager D. Disk Management E. Storage Explorer F. Computer Management G. System Configuration H. File Server Resource Manager (FSRM) Answer: A Explanation:

https://docs.microsoft.com/en-us/windows-server/identity/solution-guides/deploy-a-central-access-policy--demonstration-steps-#BKMK_1.4 NEW QUESTION 192 Your network contains an Active Directory forest named contoso.com. All domain controllers run Windows Server 2016. Member servers run either Windows Server 2012 R2 or Windows Server 2016. Client computers run either Windows 8.1 or Windows 10. You need to ensure that when users access files in shared folders on the network, the files are encrypted when they are transferred over the network. Solution: You disable SMB 1.0 on all the computers in the domain, and then you enable the Encrypt data access option on each file share. Does this meet the goal? A. Yes B. No Answer: B

NEW QUESTION 193 You deploy Windows Server 2016 to a server named Server1. You need to ensure that you can run Windows Containers on Server1. Solution: On Server1, you enable the Containers feature, and then you install the PowerShell for Docker module. You restart the server. Does this meet the goal? A. Yes B. No Answer: A Explanation:

<https://docs.microsoft.com/en-us/virtualization/windowscontainers/deploy-containers/deploy-containers-on-server> NEW

QUESTION 194 Your network contains an Active Directory domain named contoso.com. The domain contains 100 servers. You deploy the Local Administrator Password Solution (LAPS) to the network. You discover that the members of a group named FinanceAdministrators can view the password of the local Administrator accounts on the servers in an organizational unit (OU) named FinanceServers. You need to prevent the FinanceAdministrators members from viewing the local administrators' passwords on the servers in FinanceServers. Which permission should you remove from FinanceAdministrators? A. all extended rights B. read all properties C. read permissions D. list contents Answer: A Explanation:

<https://4sysops.com/archives/set-up-microsoft-laps-local-administrator-password-solution-in-active-directory/> NEW QUESTION

195 Your network contains an Active Directory domain named contoso.com. You download Microsoft Security Compliance Toolkit 1.0 and all the security baselines. You need to deploy one of the security baselines to all the computers in an organizational unit (OU) named OU1. What should you do? A. Run 1gpo.exe and specify the /g parameter. From Policy Analyzer, click Add. B. From Group Policy Management, create and link a Group Policy object (GPO). Select the GPO and run the Import Settings Wizard. C. From Group Policy Management, click Group Policy Objects, and then click Manage Backups.... D. From Group Policy Management, create and link a Group Policy object (GPO). Run 1gpo.exe and specify the /g parameter. Answer: B Explanation:

<https://docs.microsoft.com/en-us/windows-server/identity/ad-fs/deployment/distribute-certificates-to-client-computers-by-using-group-policy> NEW QUESTION 196 Your network contains an Active Directory domain named contoso.com. The domain contains a member server named Server5 that runs Windows Server 2016. You need to configure Server5 as a Just Enough Administrator (JEA) endpoint. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Generate a random Globally Unique Identifier (GUID). B. Create and export a

Windows PowerShell session. C. Create and register a session configuration file.
D. Deploy Microsoft Identity Manager (MIM) 2016. E. Create a maintenance Role Capability file. Answer: CE Explanation: <https://docs.microsoft.com/en-us/powershell/jea/session-configurations>
<https://docs.microsoft.com/en-us/powershell/jea/role-capabilities> NEW QUESTION 197 HotSpot Your network contains an Active Directory domain named contoso.com. You are deploying Microsoft Advanced Threat Analytics (ATA) to the domain. You install the ATA Gateway on a server named Server1. To assist in detecting Pass-the-Hash attacks, you plan to configure ATA Gateway to collect events. You need to configure the query filter for event subscriptions on Server1. How should you configure the query filter? (To answer, select the appropriate options in the answer area.)

Answer Area

Event log to configure:

Application
Directory Services
Security
System

Event ID to include:

1000
1001
1026
4776
4907

Answer: Answer Area

Event log to configure:

Application
Directory Services
Security
System

Event ID to include:

1000
1001
1026
4776
4907

Explanation: <https://docs.microsoft.com/en-us/advanced-threat-analytics/configure-event-collection> NEW QUESTION 198 Drag and Drop Your network contains an Active Directory domain named contoso.com. The domain contains several Hyper-V hosts. You deploy a server named Server22 to a workgroup. Server22 runs Windows Server 2016. You need to configure Server22 as the primary Host Guardian Service server. Which three cmdlets should you run in sequence? (To answer move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.)

Cmdlets

Install-HgsServer

Install-Package

Install-ADDSDomainController

Enable-
WindowsOptionalFeature

Initialize-HgsServer

Install-Module

Answer area

Answer:

The screenshot shows a Windows command prompt window with the title 'Cmdlets'. The command 'Install-ADDSDomainController' is entered and executed. The output shows the installation of the HGS server components. The command 'Install-HgsServer' is also entered and executed. The output shows the initialization of the HGS server. The command 'Initialize-HgsServer' is also entered and executed. The output shows the successful completion of the installation. The command 'Enable-WindowsOptionalFeature' is also entered and executed. The output shows the successful completion of the installation. The command 'Install-Module' is also entered and executed. The output shows the successful completion of the installation. The website 'www.passleader.com' is visible in the background.
