

CCVP/CCIP QoS(642-642) Lab ? DSCP & CoS

You are required to configure the fa0/1, fa0/10 and fa0/11 ports on the Cisco Catalyst 2950 switch according to the following: On port fa0/1, trust all incoming DSCP settings. On port fa0/11, trust all incoming CoS settings. On port fa0/10, trust the incoming CoS setting only if a Cisco IP Phone is connected to the fa0/10 port; otherwise do not trust any CoS or DSCP markings coming in.

The Answer:

```
2950-SWITCH>en          2950-SWITCH#config terminal          2950-SWITCH(config)#cdp enable
2950-SWITCH(config)#interface fastethernet0/1          2950-SWITCH(config-if)#mls qos trust dscp
2950-SWITCH(config-if)#no sh          2950-SWITCH(config-if)#interface fastethernet0/11          2950-SWITCH(config-if)#mls
qos trust cos          2950-SWITCH(config-if)#no sh          2950-SWITCH(config-if)#interface fastethernet0/10
2950-SWITCH(config-if)#mls qos trust device cisco-phone          2950-SWITCH(config-if)#no sh
2950-SWITCH(config-if)#end          2950-SWITCH#show mls qos interface fastethernet0/1          2950-SWITCH#show mls qos
interface fastethernet0/11          2950-SWITCH#show mls qos interface fastethernet0/10          2950-SWITCH#copy
